

Class 700 Desiro City Automated Announcements for Train Simulator Classic - Manual

By Jonathan Davis (theepicfrog15)

Installation

Installation through ATS Launcher

Open ATS Launcher and select Browes ATS Content. Scroll down to Thameslink Class 700 Announcement Plugin and press Install. The process will now begin. Once it has downloaded you will be asked if you want the branding patch applied. This will replace the default announcements with the official ones from the FOI request. Press Yes to have these download or No if you would rather not. If you select yes these will then download once complete, please follow the instructions below under the “Once Installed via either method” heading.

Installation from downloaded Zip folders

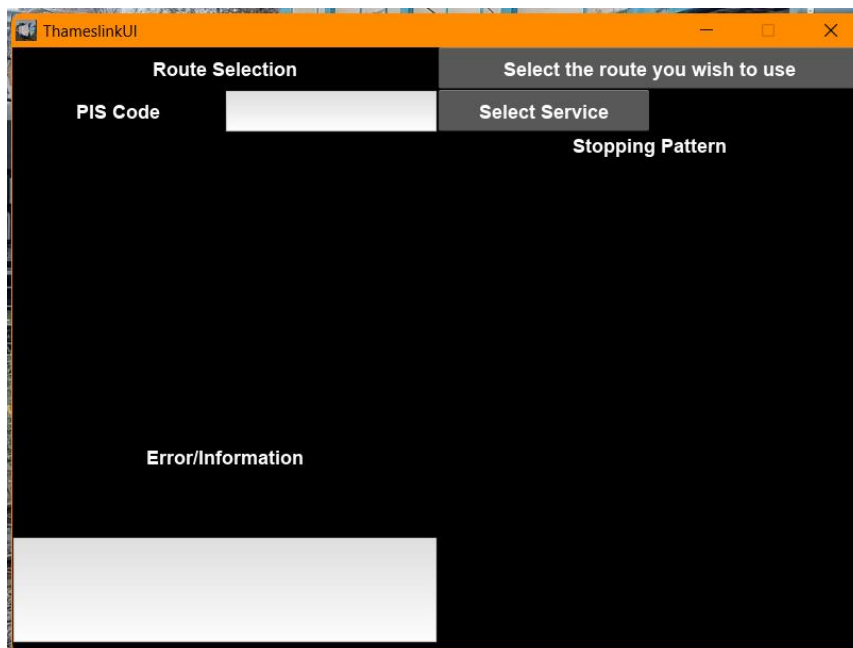

Download the zip file provided. Extract this and then drag the contents into your TS Folder. Make sure that the exe program is in the same folder as RailDriver64.dll this should be Railworks/plugins. If you required the Branding patch download, extract this and then copy over as you had already done before, overwriting any existing files. You should then also have now got a folder in plugins called Audio.

Once Installed via either method

Navigate to Railworks/plugins and locate the Thameslink_Announcement.exe file. I would recommend adding a shortcut to the program to somewhere more easily accessible, like for example your desktop for easy launching. To add a shortcut to your desktop right click on the file and select ‘Send to’ > Desktop (create shortcut) (In Windows 11 you will have to right click and press Show more options to be given the option to Send to Desktop).

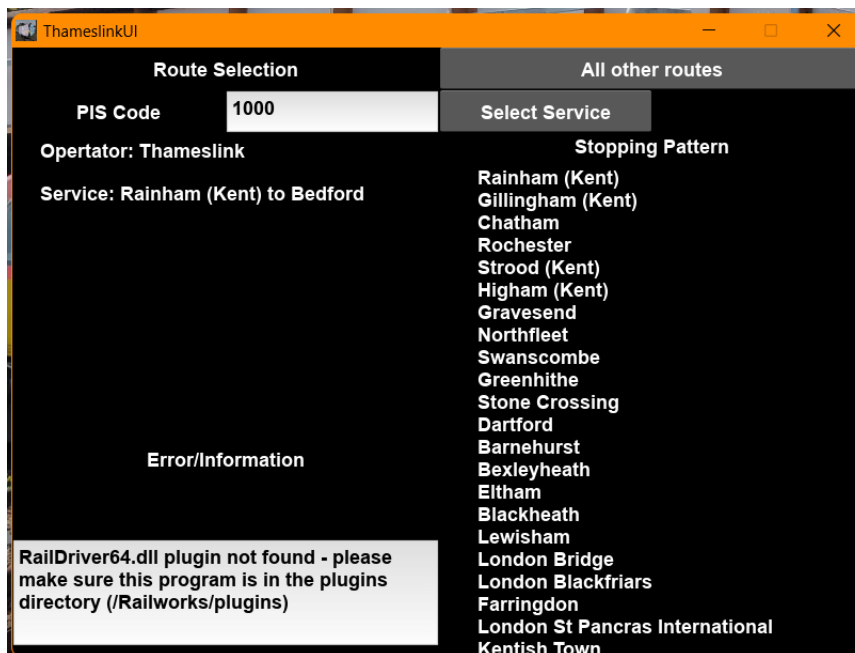

Using the program

When ready double click on the exe to launch.

Once launched you will be able to see the UI and it should look like this. Firstly, click on ‘Select the route you wish to use’ and select either ‘ECML Based routes or ‘All other route’ make this decision based on what route you are on. More information on the specifics of each below.

Once you have selected which route you are on enter your PIS Code in the small white box. Then push 'Select Service' (See later in the manual for a list of these). If you entered PIS Code is valid you will see, then appear on the screen the stopping pattern for your selected service as well as the name and operator. At this point if you are running the program in the wrong directory an error message will appear informing you of this otherwise if you have yet to load the scenario or enter Quick drive it will inform you that it can't find the right rolling stock. The correct rolling stock is any of the Desiro Citys included with the Armstrong Powerhouse Class 700/707/717 pack. If you are not loaded in yet the program will tell you and then just check again after a few

seconds. If the stopping pattern list goes off the bottom of the screen you can scroll through this list using the scroll wheel on your mouse, two finger scrolling on a trackpad or scrolling with a touchscreen. This list will also identify which stop you are at if you are stopped at a station or tell you which stations you are between when on the move.

Once loaded in the program will play the

required announcements as and when they are needed to be played. If you want to change the PIS Code remove the current value that is in the box, enter your new code and push 'select service' you should then see the stopping pattern change as well as route name.

Announcements will now also change the reflecting the change to the new service. If you need change which route you are on, click on your current route selection and the drop down will appear then select the route you want to use. If you want to exit the program press the 'X' at the top of the screen.

Requirements

To use the software, you will need to have the Armstrong Powerhouse Class 700/707/717 enhancement pack and any route currently available in Train Simulator which the Class 700 would normally run on.

Supported Routes

Kent Based Routes

- Chatham Main line
- Chatham Mainline & Medway Valley*
- Chatham Mainline (Victoria and Blackfriars to Dover and Ramsgate)
- Faversham High Speed**
- London to Brighton
- South London Network
- Midland Mainline St Pancras to Bedford

- AP Midland Mainline: London to Bedford EP
- Any of Danny Leach's route merges based on the above routes***
- Niklas SEML Steam Workshop Route*
- Sutton and Mole Valley Line

*The stations on the Medway valley section have not been added but no Thameslink or Great Northern services stop at these stations so this will not affect the use of the program

**On Faversham High Speed announcements for Rochester may not work due the location for Rochester being in its old location on the route and the new location is the one that has been used. As the new Rochester station opened before Class 700s were introduced I do not see this as a problem as it would be unrealistic to run a Class 700 at a time before the new Rochester station opened.

***Some of the merged routes do run onto areas which used the NLL, WLL or Goblin and these aren't supported but Class 700s never run there so is not a problem. And the same caveat about the Medway Valley also applies and Rochester on routes set in 2012 if applicable.

ECML Based Routes

- DTG Original London to Peterborough
- ATS Kings Cross to Kings Lynn and Peterborough (KGX-LDS&YRK Merge should work but is untested)
- DPS ECML South
- London to Peterborough with Hertford Loop
- GU Northern City Extension (on both the original ECML and the Hertford Loop)

Services

Included in the program are over 570 different stopping patterns which have been found. Most of these are Thameslink services but I have also included all Great Northern services. In general, you would only be using the services which Class 717s do run on, but I have included all Great Northern stopping patterns for added variety in case Class 700s end up on Great Northern services or there is a missing Thameslink stopping pattern.

I have sorted the services below into groups based on the lines they are operating on, and which station is there start or end point at the southern end of their journey.

Most of the stopping patterns came from research in May 2023 covering both sides of the May 2023 timetable change. Some stopping have been added later as when they have discovered so some may well be missing but I believe I have probably got most of the combinations.

Audio

The audio is all from the Freedom of Information request, which was made to Southeastern in 2022 I believe, and I do not claim any rights over them. The only changes I have made are converting the file types and changing some of the names due to incorrect titles found.

There is one incorrect announcement I know of, but I have used and that is for changing to other services at Farringdon.

Problems/Issues/Feedback

If you notice and problems with the software, can't find the service pattern you and want and would like it added or notice in accuracies that you would like to let me know of leave are

comment on the listing. Say something on the Facebook group which I may pay attention to, or the best way would be to email me on epicfroggame17@gmail.com

I really hope you enjoy what I have created.
